 - 7.3. Presale Bonuses
8. ALYA Mining
 - 8.1. Individual Mining
 - 8.2. Pool Mining
9. Social Media

1. WHAT IS ALYATTES?

1. WHAT IS ALYATTES?

The ALYATTES project is not basically a single cryptocurrency or project. The project is the name of the group of projects that support each other and are in continuous development.

ALYATTES Project aims to develop platforms by focusing on three main subjects namely, Social Assistance, Crypto Assets and Mobile Entertainment. By implementing these platforms step by step within legal frameworks, ALYATTES aims to create a community that offers its supporters a solution to make money as well as entertainment and synergy.

1. WHAT IS ALYATTES?

An Ecosystem will be created within the framework of the ALYATTES project. With this system, almost everyone using a Smart Phone in the world will be able to take their place, benefit from the services offered and witness the innovations with us.

In this presentation, only certain ideas about ALYATTES will be explained. However, it should be noted that many other platforms that are developed by the excellent R&D people in the background and are looking for ways to integrate it into the ALYATTES system.

In this presentation, only certain ideas about ALYATTES will be explained. However, it should be noted that the excellent R&D people are working relentlessly to develop other platforms and are looking for ways to integrate it into the ALYATTES system. Such systems will take their place in the Alyattes ecosystem over time.

2. WHAT IS ALYA TOKEN?

2. What is ALYA Token?

ALYA Token is at the heart of the ALYATTES Project. The token resides on the Binance Smart Chain network on which the ecosystem is built. Alya Token is a crypto asset with a well-established Auto Ecosystem that will prevent coin inflation and guarantee the sustainability of ALYATTES projects.

ALYA Token Auto Ecosystem is created based on a 5% taxation. The taxation is carried out in a completely decentralized manner without the need for any human interaction in every transfer.

2. What is ALYA Token?

Technically, the Total Supply of ALYA Token is limited to 205,000,000 ALYA. 65.26% of this total supply (133,800,000 ALYA) is locked in the ALYA Smart Contract to be produced with the Proof of Active method in the next 5 periods.

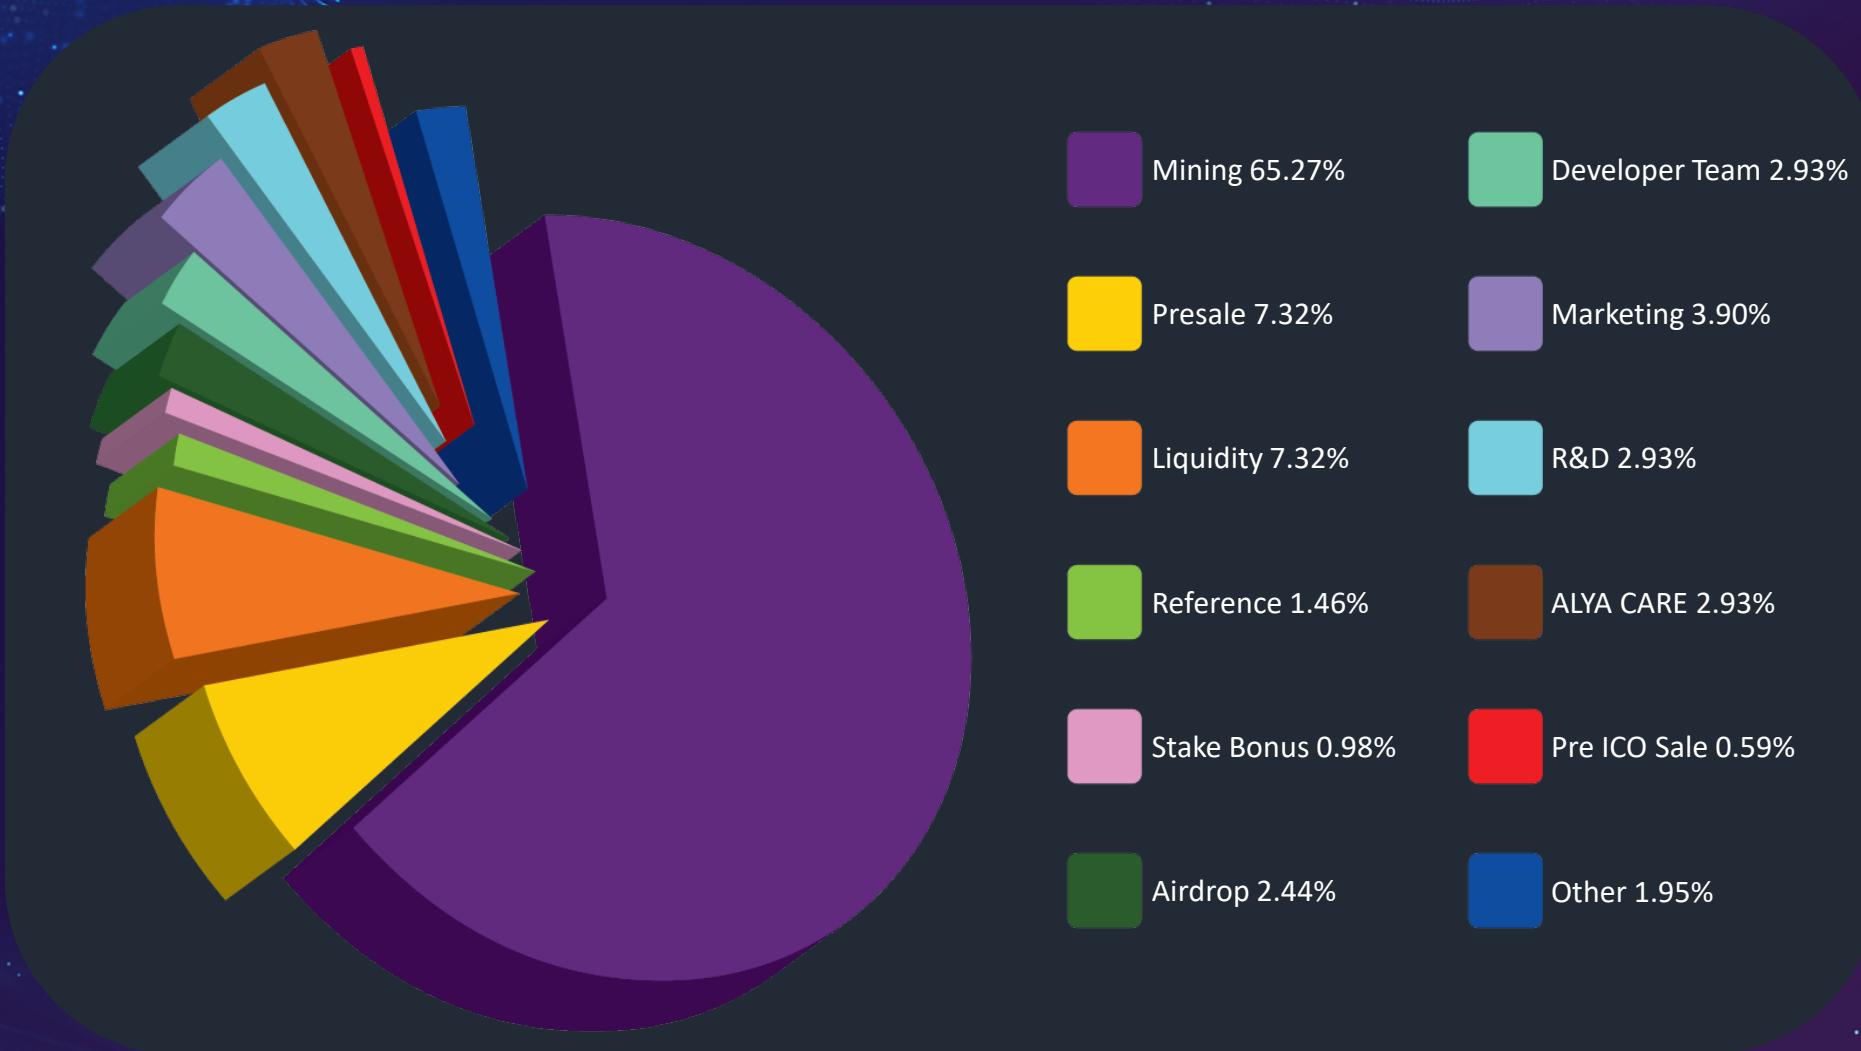

The purpose of usage and wallet addresses of the circulating ALYA Tokens will be explained in more detail on the Token Economy.

2.1. Technical Information

Contract Address	0x72690c447aa1ea53042899b7402d10a176819102
Main Network	Binance Smart Chain (BEP20)
Decimal	9
Total Supply	205.000.000
Premined	71.200.000
Locked	133.800.000
Memo	Yes
Mining	PoA & PoS
Mining Period	1500 Block
Smart Contract	Decentralized
Audit Report	Yes

2.2. Token Economy

2.2. Token Economy

Purpose of Usage	Share in Total	Number of Coins
Presale	7.317073%	15,000,000.00
Reference Bonus	1.463415%	3,000,000.00
Stake Bonus	0.975610%	2,000,000.00
Liquidity Coin	7.317073%	15,000,000.00
Airdrop	2.439024%	5,000,000.00
Developer Team	2.926829%	6,000,000.00
Marketing	3.902439%	8,000,000.00
R&D	2.926829%	6,000,000.00
ALYA Care	2.926829%	6,000,000.00
CoinTool Sale	0.585366%	1,200,000.00
Other	1.951220%	4,000,000.00
Mining	65.268293%	133,800,000.00
Toplam	100.00%	205,000,000.00

2.2. Token Economy

The addresses and usage areas of the wallets in the Token Economy are explained in detail by the ALYA Team in the Whitepaper. You can download the Whitepaper from our GitHub page to review.

3. ALYA Features

3.1. Auto Ecosystem Information

2% Holders Bonus:

The 2% ALYA amount deducted from each transfer made through the ALYA Contract is automatically distributed to those who hold ALYA in their wallet. Hence, the investors make money not only from the price change, but also from the transfers.

2% Automatic Burn:

The 2% ALYA deducted from each transfer is sent to the 0x000dead wallet, reducing the amount of ALYA in circulation. As it is known, an asset with a low supply will have more value.

3.1. Auto Ecosystem Information

1% ALYA Care Fund:

The 1% Coin Amount that has been automatically deducted from the transfers will be sent to the wallet named as ALYA Care to create the sustainable finance source of the project.

3.2. Memo Feature

Although transfers with Memos on Blockchain have started to become more and more popular, as the ALYA team, we think that it has not yet seen the value it deserves. Crypto Transfers without Memos are like Bank transfers without an explanation. Therefore, it is not known why, for what and from whom the transfer came. Technically, it puts an extra workload on Exchanges and Institutional Companies if they take crypto money as a means of payment.

ALYA Token offers unlimited and alphanumeric memo features to its users. This feature also allows it to be sent in open or encrypted form.

3.2. Memo Feature

Although it is not common at the moment, ALYA Token will not ignore Memo in the systems it will develop. And by developing Usage Areas with Memo in many areas, it will increase the awareness of this feature by widespread it.

It will also provide technical support to corporate users who want to add ALYA to their system with Memo Transfers.

4. What is ALYA CARE?

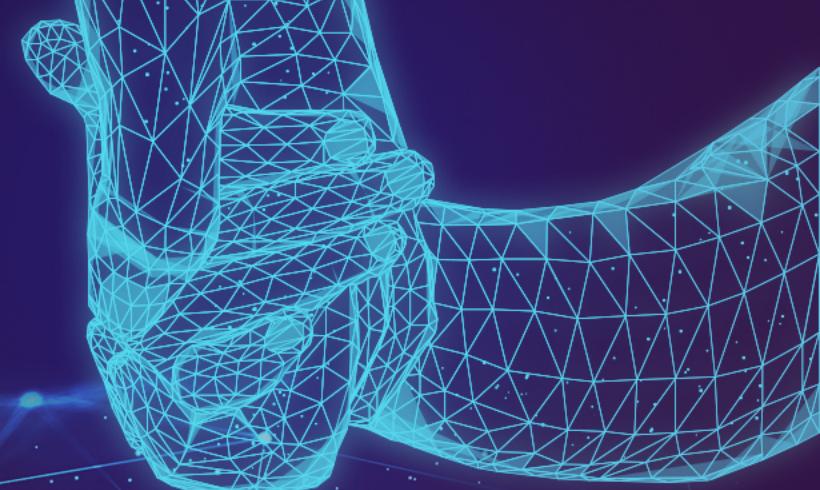

4. What is ALYA Care?

ALYA Care is the social aid platform of the ALYATTES Project.

The headquarters of ALYA Care Foundation is established in Vienna, Austria. However, in case of legal requirements, it will not hesitate to establish a foundation where needed.

The part that distinguishes the ALYA Care project from other similar projects is that the continuity and sustainability of ALYA Care funds are secured by the ALYA Token ecosystem.

4. What is ALYA Care?

ALYA Care project will provide aid to the children in need through professional and proven organizations, taking into account the needs of children without any discrimination anywhere in the world.

\$20 might be worthless for us, but unfortunately we live in a world where children have to lose their sight because of the lack of money.

We know that today's children are our futures.

5. ALYA Finance

5. ALYA Finance

ALYA Finance platform is the place where all financial operations of the ALYATTES Project will be performed.

In addition to ALYA Token's first and only official pool mining service, ALYA Finance plans to introduce many other services such as Farming, Soft Stake and even Yield Farming to ALYA users.

ALYA Finance team continues to work relentlessly in order to examine all current opportunities in the cryptocurrency market and present them to ALYA users.

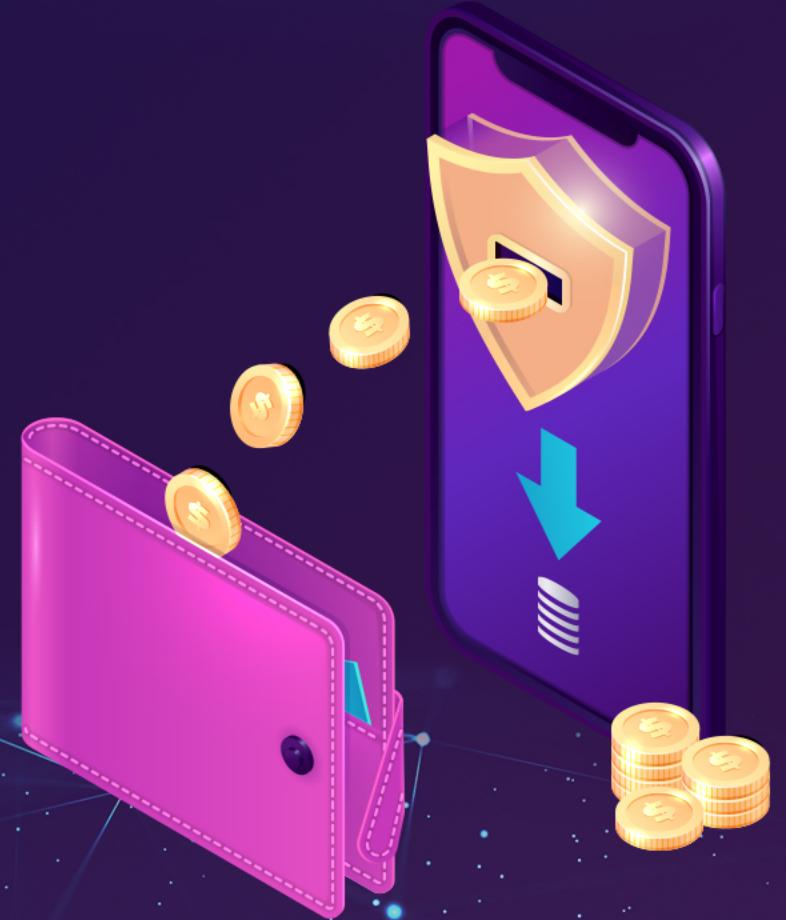

6. Other Projects

6. Other Projects

The main projects of ALYA Token and ALYATTES Platform, which are planned to create its own ecosystem, increase interest in ALYA Token and add new areas of use, and whose feasibility has been approved by our technical team, are as follows;

ALYA Swap: A platform for instant exchange of coins on a specific network through decentralized wallets.

6. Other Projects

ALYA Ex : A centralized exchange based on ALYA Token.

ALYA AI Bot: A platform where ALYA users can participate in automatic trades using the API and add even more value to their funds with the Expert Trader team. Here, only the users have control of their accounts.

6. Other Projects

ALYA Wallet: Alya wallet is built on ALYA Token. However, it is a wallet application where you can keep thousands of cryptocurrencies completely decentralized.

ALYA Fun: A platform based on ALYA Token, where a journey begins with basic games and goes to the endless depths of the entertainment world.

Apart from these platforms, dozens of other projects under development will continue to support ALYA Token's ecosystem.

7. Presale

7.1. Presale Conditions

Presale will be carried out according to the number of coins and prices stated in the predetermined phases. These number of coins and prices will never be changed.

As the quantities determined in the active phases are sold, the next phase will be activated automatically.

The presale process depends on two conditions. The presale will end early if all phases are sold-out or it will continue for 45 days.

7.1. Presale Conditions

Unsold coins will be sent to the Airdrop wallet as specified in the Whitepaper and will be used for the promotion of ALYA.

At the end of the presale, users will be given a 7-day decision period. During this period of time users participating in the presale will notify the Alya team that they either want Wallet withdrawal or Mining.

7.1. Presale Conditions

During the presale, only TRC20 USDT will be accepted, USDT sent from other networks will not be processed. Selecting the correct network is the user's own responsibility.

From the amount entered for purchasing, 3 USDT will be reduced to cover internal transfers (Individual Wallet -> Cold Master Wallet -> ALYA Distribution) and the remaining amount will be converted to ALYA.

7.1. Presale Conditions

This amount is fixed at 3 USDT for both 100 USDT purchases and 100,000 USDT purchases.

The presale will start on the day and time that will be released soon. According to the first come first served principle, the system will identify the first purchase and transfer the coin. Hence, no privilege will be given to anyone, and every investor will start their ALYA adventure on equal terms.

7.2. Presale Phases

Step	Price	USD	Number of Coins	Total Bonus Amount	Bonus Ratio
Step 1	0.10	50,000.00	500,000.00	0.00	%0
Step 2	0.20	100,000.00	500,000.00	0.00	%0
Step 3	0.30	150,000.00	500,000.00	0.00	%0
Step 4	0.40	400,000.00	1,000,000.00	70,000.00	%7
Step 5	0.45	450,000.00	1,000,000.00	80,000.00	%8
Step 6	0.50	1,000,000.00	2,000,000.00	200,000.00	%10
Step 7	0.55	1,100,000.00	2,000,000.00	300,000.00	%15
Step 8	0.60	1,500,000.00	2,500,000.00	400,000.00	%16
Step 9	0.65	1,625,000.00	2,500,000.00	450,000.00	%18
Step 10	0.70	1,750,000.00	2,500,000.00	500,000.00	%20

7.3. Presale Bonuses

7.3.1. Referral Bonus

Registrations to the presale system will be made only with the referral code, each user will have his own reference code.

Users will be able to earn a bonus of up to 6 depths over the amount received by the people they introduce to ALYA.

Referral bonuses will be automatically transferred to the person's panel after the purchase is made.

Level	Bonus Amount
Level 1	%8
Level 2	%5
Level 3	%3
Level 4	%2
Level 5	%1
Level 6	%1

7.3.2. Mining Bonus

Mining Bonus will be given in certain phases at the rates specified in the table on the previous page.

These Bonuses will not be reflected on the user panel, and if the coins received are sent to mining, they will be directly defined as Mines in the person's account.

The awarded Mining Bonus will provide production to users for 1 year and at the end of 1 year, it will be deducted from the users' account and sent to the Burning Wallet, reducing the number of ALYA in circulation.

Step	Bonus Amount
4. Step	%7
5. Step	%8
6. Step	%10
7. Step	%15
8. Step	%16
9. Step	%18
10. Step	%20

8. ALYA Mining

8. ALYA Mining

65.27% of the total supply of ALYA Token (133,800,000) is locked with a contract to be produced in 5 periods through ALYA Mining.

This mining path is completely decentralized, tied to a random mathematical formula in the Smart Contract. Thanks to this method, issues such as which award will come and when, how many awards will come in a day have been taken out of the control of everyone including the Developer Team.

The mathematical operations mentioned above are explained in detail in ALYA Whitepaper.

8. ALYA Mining

ALYA Mining is designed based on the Proof of Stake and Proof of Active consensus.

ALYA Mining Reward Scheme is encoded in the following codes:

PERIOD	BLOCK NUMBER	REWARDS IN EACH BLOCK	TOTAL PRODUCTION
Period 1	0 – 300	58,000	17,4000,000
Period 2	301 – 600	81,000	24,300,000
Period 3	601 – 900	98,000	29,400,000
Period 4	901 – 1,200	109,000	32,700,000
Period 5	1,201 - 1500	100,000	30,000,000

8.1. Individual ALYA Mining

ALYA Token offer an open mining system to every user all over the world. With an average computer and the ALYA Mining Program, which can be installed in just a few clicks, ALYA users can start mining.

Since ALYA Mining is in the Proof of Active consensus, it does not require any special equipment and extra power expenditure.

Although it is not recommended by the ALYA Team for security reasons, ALYA Mining can be done even with a Virtual Computer.

Minimum Individual Mining rate is 500 ALYA.

Detailed explanation for individual mining will be published on ALYA Github page.

8.2. Pool Mining

The centralized Pool Mining is one of another ALYA Mining method.

In Pool Mining, mining opportunities will also be given to small investors and everyone will benefit from the pool facilities.

In Pool Mining, several important issues such as Fee, Server Service, and Security are covered by the Pool Company.

Pool Mining Conditions will be determined by the company providing this service and the extra bonus or referral income to be given is at the discretion of this company.

The first pool mining service will be provided through ALYA Finance. And ALYA Finance will be designed as a completely user-oriented system, not income-centered.

ALYA Finance Pool Mining terms will be published in a separate file on the ALYA Github page.
